

A Better Approach to Hail Insurance

Weather causes billions of dollars in damage each year, and inadequate, unreliable coverage options leave the marketplace vulnerable. As a business owner, you're faced with increasing premiums and deductibles, lengthy quotes and claims processes, and even canceled coverage. Vortex Hail Safe is different, offering quick, simple, and cost-effective coverage that bridges the financial gap left by traditional policies.

How It Works

- ✓ **Customize Your Policy**
Select payout limits and hail size options to suit your business needs.
- ✓ **Rest Easy with No Financial Deductible**
Parametric insurance breaks the mold, eliminating financial deductibles.
- ✓ **Enjoy An Automated Claims Process**
If a storm hits, independent third-party data sources verify the storm's unique fingerprint, and claims are automated without burdensome paperwork or adjusters.
- ✓ **Receive Your Payout in Just a Few Weeks**
If your policy triggers, you'll typically receive your payout in less than two weeks.

A Simple, Transparent Alternative

Coverage Options	Ideal For:
Payout of coverage limit for hail > 2 in. diameter	Solar Panels / Farms
Payout of coverage limit for hail > 1.5 in. diameter	Roof
Payout of coverage limit for hail > 1.25 in. diameter	Auto / Open Lot
Custom triggers are available as well	Any business need

DON'T RISK IT, VORTEX IT.

VORTEX[®]
WEATHER INSURANCE

HAILSAFE

	Traditional Property Insurance	Vortex HailSafe
Adjusters	Delays and challenges in receiving adjusters' valuations can result in payments being issued later than anticipated	Claims are automated. No adjusters needed.
Payouts	Up to 12 weeks	Settlement payouts are typically received in one or two weeks
Deductible	Significant Deductibles - Policy Sub-limits - Policy Exclusions	Zero
Coverage	Coverage requirements are complex with loss history or hail matrices.	You choose your coverage — damage to vehicles, roofs, property or revenue loss, advertising, and/or other business expenses.
Customization	Limited	Flexible coverage options tailored to storm severity, desired payout, or a custom structure.
