

VORTEX

SUPPLEMENTAL HURRICANE INSURANCE

How Payouts Are Determined

HOW IT WORKS

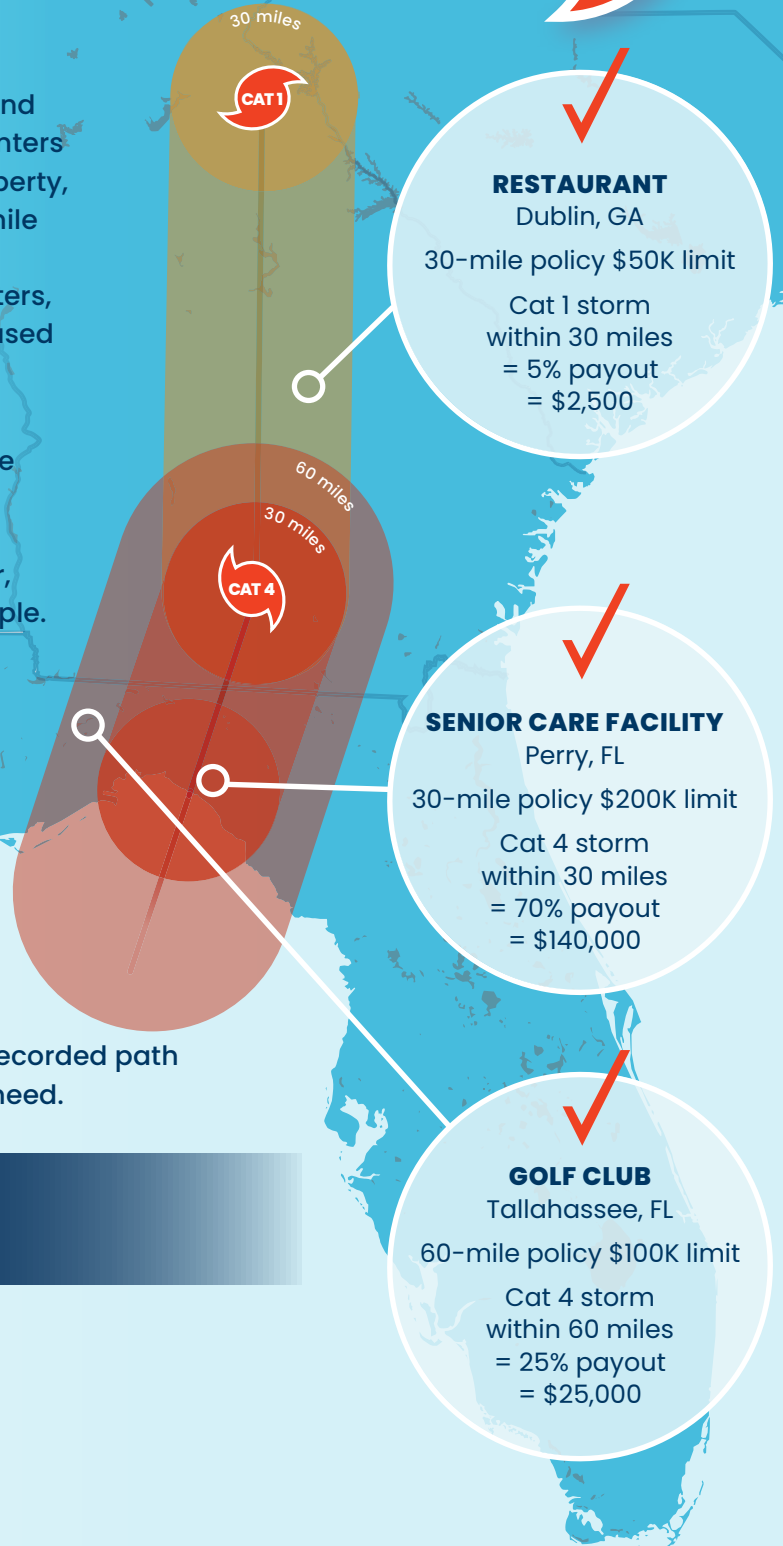

You choose your coverage radii, 30 or 60 miles around your business. If the recorded track of a hurricane enters the 30-mile coverage area that surrounds your property, you receive a payout in less than 30 days. The 60-mile policy covers major hurricanes only (Category 3 or higher). No peril exclusions, financial records, adjusters, or inspections are needed, and payouts increase based on the storm's proximity and intensity.

Vortex covers flood, storm surge, wind, business interruption, and any other financial loss. Policies are activated 30 days after signing and last 12 months. Claims are automatic and based on independent third-party data from the National Hurricane Center, so once a policy is bound, you're all set. It's that simple.

A REAL-LIFE EXAMPLE FROM HURRICANE HELENE

The map represents the storm track of Hurricane Helene and examples of three businesses in the hurricane's path, as well as example policy details and payout amounts.

With Vortex, businesses located within the storm's recorded path receive payouts, which they can use however they need.
